

GSAS V1 Errata

Raytheon/Jeff Lee, GSAS Software Lead

Last Modified April 18, 2001

In the version 1 release of GSAS, a table containing record sizes was omitted from the GLAS Standard Data Products Specification – Level 1 and Level 2 documents. In addition, a table (6-7) in the GSAS Users Guide has inaccurate record sizes. The following table contains the correct record sizes for the GSAS V1 products.

Note that due to a source file error, GLA06's record size is 12 bytes greater than it should be. All V1 GLA06 files have 12 bytes of undocumented padding added to each record. The actual record size (including the pads) is 5500 bytes.

Product Type	Record Size (bytes)
GLA01	4592
GLA02	56928
GLA03	7808
GLA05	13132
GLA06	5500
GLA07	67112
GLA08	296
GLA09	3744
GLA10	3968
GLA11	556
GLA12	5108
GLA13	5028
GLA14	8908
GLA15	5204
